

TRAINING

GOALS

- Provide accessible and cost-effective training courses in aerosol technology and issues impacting on the industry for Association members and, where appropriate, the wider industry.

TARGETS 2014-15

- Expand training offering based on industry feedback and needs, including introducing an Aerosol Labelling Workshop in March 2015.
- Examine opportunities for inter-State training and seminars.
- Prepare for training events - the Aerosol Labelling Workshop in March 2015, the Introduction to Aerosol Technology Course and Factory Tours in August 2015, and a potential Aerosol Regulatory Workshop end 2015.

KEY ACHIEVEMENTS IN 2013-14

Completed three training activities/seminars:

1. TWO DAY INTRODUCTION TO AEROSOL TECHNOLOGY COURSE & FACTORY TOURS - AUGUST 2013

"Overall, course has been very informative and well run." - marketer

"Very good cover on all aspects of aerosols." - student

"The course was very informative and enjoyable. Definitely enjoyed the context and information that was delivered." - filler

2. AEROSOL REGULATORY WORKSHOP - OCTOBER 2013

"Very informative and well-run day. Good opportunity to network." - manufacturer/importer

"This has been a useful overview on current and upcoming regs." - distributor

3. ONE DAY AEROSOL TECHNOLOGY FOUNDATION COURSE & FACTORY TOURS - APRIL 2014

"All segments were delivered with great detail and passion. Well thought out and covered all aspects of manufacturing from raw materials to finished product." - retailer

"Very good structure, covered all the elements." - distributor

"Very well organised. Really enjoyed. Great job and keep it up!" - filler

"It was excellent, well integrated course." - chemical supplier

"Very well organised and experienced speakers and complete agenda." - component supplier
